

# a whole new light

## introducing the Switch60

*Switch60 is a cost-effective, high-performance, warm white, true 60W equivalent replacement lamp for use in residential, commercial, and hospitality settings.*

For uncompromising performance and brilliant results, the Switch60 is a leader: long lasting, with smooth dimmability and a full 830 lumens—a true 60W equivalent bulb. Its proprietary design makes it a standout, a crown jewel, while its light quality and distribution rivals the warm white beauty of the incandescent light that we all know and love.

Our thermal cooling system works on all sides, allowing the lamp to be omni-directional with no compromise in either driver function or LED output. Featuring an ultra-compact driver that fits into the screw base, the driver's circuit design is extremely efficient, noiseless and compatible with most any dimmer. Simply put, the Switch60 leads the way in residential lighting solutions for today and tomorrow.

### better lighting from every angle

- **Unique Design:** Unique industrial design within the standard A-19 form factor.
- **Bright Light Output:** 830 warm white lumens—a true 60W replacement lamp.
- **Uncompromising Functionality:** Instant on, beautiful dimming, operates perfectly in all orientations—up, down, and sideways—with no overheating or reduction in bulb lifetime.
- **Lower Total Cost:** Lasts up to 20 times longer than conventional lighting.
- **Comfortable Light:** More similar to the warmth and radial flux of an incandescent than any other LED replacement lamp.
- **Outstanding Color Accuracy:** A brilliant display of light with a CRI of 85.
- **Highly Sustainable:** Reduced energy consumption, performing brilliantly for thousands of hours, free of hazardous materials. All lamp components are completely reusable or recyclable, so no part ever goes into a landfill.

## Lighting Facts Per Bulb

Brightness	830 Lumens
Estimated Yearly Energy Cost	\$1.71
Based on 3 hrs/day, 12¢/KWh Cost depends on actual rates and use	
Life	
Based on 3 hrs/day	18 years
Light Appearance	
Warm	Cool
	2750 K
Energy Used	13 watts

*Switch 60 was designed as a replacement for incandescent and CFL lighting in residential and commercial applications. It is suitable for all indoor applications, is compatible with any dimmer, and can be used in all orientations—up, down, sideways.*

## PRODUCT NAME: Switch 60

Shape:	A19 (Edison standard)
Fitting:	E26 (Standard screw base)
Power:	13W
Voltage:	120 VAC
Line frequency:	50-60 Hertz
Average lifetime:	20,000 hours
Color temperature:	2750 Kelvin
Light Output:	830 Lumens
Color Accuracy:	85 CRI
Efficacy:	70 Lumens/Watt
Diameter:	2.73 inches
Height:	4.41 inches
Dimmable:	Yes: 20-100%

Specifications based on current test data and subject to change.
